

SYNERGY

CREST/ CCI Hosting

With over 10,000 members, the CREST SWIFT service aims to increase the automation and connectivity to foreign depositories for the CREST settlement system.

Synergy's SWIFT Alliance CREST Hosting service enables you to access SWIFT through a complete, independently accredited, SWIFT infrastructure that our SWIFT experts maintain and operate in fully resilient data centres. We offer a secure, resilient and extremely cost effective solution for CREST customers. With less equipment on your premises, you benefit from a reduction in management overhead and operational work-load backed by a comprehensive Service Level Agreement.

Dual operational data centres in London and Nottingham provide complete resilience with full contingency. The service includes continuous system monitoring from Synergy's Operations Centres in London and Nottingham.

Now is an excellent time to review your CREST connectivity. Our ability to provide migration to Euroclear's Common Communication Interface (CCI), to connect to the Single Platform will give you investment protection. Outsourcing CREST connectivity to our SWIFT service bureau will enable you to meet CCI migration requirements and deadlines whilst saving money. Synergy's service bureau combined with a range of Synergy software solutions will improve your operational efficiency and provide you with an optimum connection to your legacy systems – including any message translation requirements imposed by the migration to CCI.

- Cost Saving
- Reduced Operational Risk
- Investment Protection

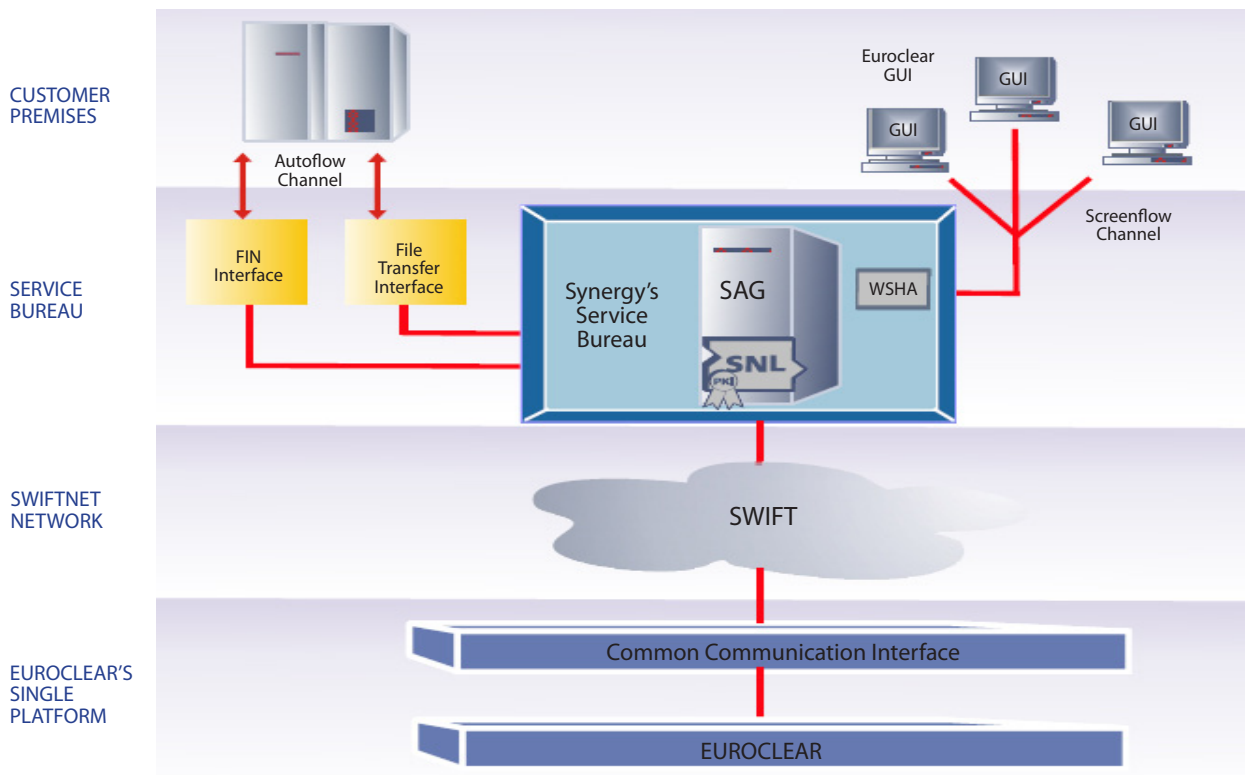

Ready Services

United Kingdom 2010

Choose Synergy for CREST Connectivity/ Euroclear CCI Migration

The Synergy Service Bureau provides two channels for connections to CCI via SWIFTNet:

1. Autoflow (The ISO based STP interface) - This connection allows the exchanges of messaging and file transfer with the Euroclear group;
2. ScreenFlow (The screen-based application) - This channel is available for manual entries or queries of the Euroclear group services.

Benefits of Synergy's SWIFT Service Bureau

- **Cost saving**
 - A single set of gateways required through the migration to CCI
 - Significantly reduces costs by using our infrastructure, know-how and experience
 - Simplify Disaster Recovery by using our resilient gateway for CREST/ CCI access via SWIFTNet
- **Hassle free migration**
 - Our expertise reduces the complexity of installation and configuration
 - Synergy's project management team ensures smooth transition to CCI
- **Reduced operational risk**
 - Peace of mind of a secure managed service covered by a comprehensive SLA
 - Secure, fully redundant infrastructure with hot standby servers at dual active data centres
 - Synergy's SWIFT Certified Engineers have an in-depth knowledge of CREST/ CCI and SWIFT
 - Fast access and recovery capability using secure Internet VPN connectivity or lease line
- **Avoid back office application changes**
 - Cost effective message transformation application with a choice of deployment options
- **Investment protection**
 - Provides access to all current SWIFTNet Services (Euclid, etc)
 - Future proofing access to new SWIFTNet Services
