

# SWIFTNet 7.0

## SWIFTNet 7.0 Implications

### Time to review your connectivity options?

Major changes in the SWIFT Alliance portfolio are affecting organisations in 2011/2012. Alliance 7.0 is the latest major release for the Alliance portfolio. Support for Alliance 6.x products (See Note \*) will end in March 2012, at which point you will need to have installed release 7.0 of your Alliance infrastructure.

The degree of disruption caused by this change will be a function of how your organisation connects to the SWIFT network. For Synergy's Fully Hosted Service Bureau customers, the process is very simple. For organisations operating their own infrastructure, the upgrade process is complicated, disruptive, time consuming and expensive. If your in-house team are already at full stretch, now is the ideal time to talk to us about your connectivity options.

- Synergy is an accredited SWIFT Service Partner which means that we can provide SWIFT trained and certified specialists to maintain and, for fully hosted clients, operate your SWIFT interface system for high availability.
- Synergy is part of the BBP Group. The BBP group of companies is the largest SWIFT Service Bureau in the world. The group is already a trusted partner for more than 300 financial institutions and corporations in 38 countries.
- Dual operational data centres in London and Nottingham provide complete resilience with full contingency. The service includes continuous system monitoring from Synergy's Operations Centres in London and Nottingham.
- Migration to our fully hosted SWIFTNet solution will save you money and give you investment protection against future upgrades.

Note \*

- SAG/SNL/SNJ/HSM end of support = end of March 2012
- SAA/SAE/SAW/RMA end of support = end of December 2012

### At A Glance

- Cost saving
- Reduced reliance on scarce specialist skills
- Hassle free upgrade
- Improved resilience
- Reduced operational risk
- Investment protection

### Benefits of Synergy's SWIFT Service Bureau

#### Cost saving

- Reduce costs by using our infrastructure, know-how and experience
- Optionally, simplify Disaster Recovery by using our resilient gateway

#### Hassle free migration

- Our expertise reduces the complexity of installation and configuration
- Synergy's project management team ensures smooth transition

#### Reduced operational risk

- Classified as non-material outsourcing, i.e. Synergy do not hold or persist any of your data. The service is for communications only and it is not possible for Synergy to view client data.
- Synergy is a leading UK SWIFT Service Bureau providing support and hosting services to more than 100 FSA regulated financial institutions and corporations
- Peace of mind of a secure managed service covered by a comprehensive SLA
- Secure, fully redundant infrastructure with hot standby servers at dual active data centres
- Synergy's SWIFT Certified Engineers have an in-depth knowledge of SWIFT
- Fast access and recovery capability using secure and encrypted internet VPN connectivity
- Optional connection via secure leased lines with multiple access points

#### Investment protection

- Provides access to all current SWIFTNet Services
- Future proofing access to new SWIFTNet Services
- Hassle free migration on future SWIFTNet upgrades
